

# FOAMATIC A

Around-the-pump foam proportioning system

## Description

---

The FOAMATIC is an automatic around-the-pump foam proportioning system. It is designed to match especially the R600 pump and can be integrated in this pump type. Three proportioning rates are possible with this system.

It is mainly used for airport- and industrial- fire fighting trucks as well as for fire boats and stationary units.

## Benefits

---

### Designed to match the R600 pump

- integrated into the pump

### Easy system

- mechanical system, mounted directly on the pump
- easy to operate

### Automatic system

- amount of foam concentrate adjusts automatically to the water flow - constant proportioning rate

### Maintenance-free

- wear-free
- due to robust mechanics

### Big foam performance

- due to around-the-pump foam proportioning system, foam on all outlets of the R600 pump available

### Big external foam suction performance

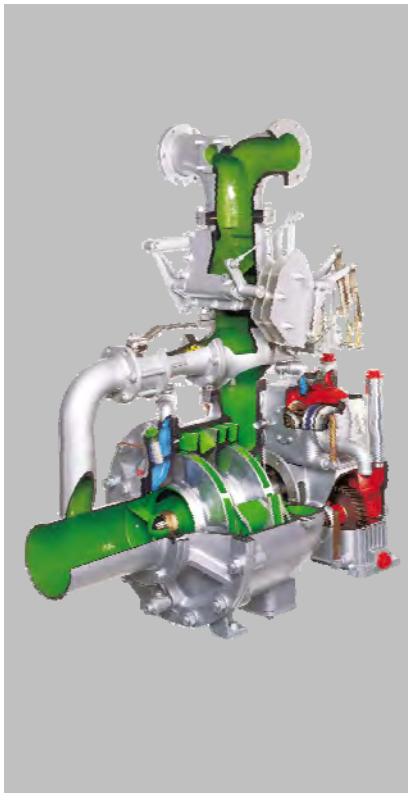

### Minimum pressure loss

### Different proportioning rates can be chosen

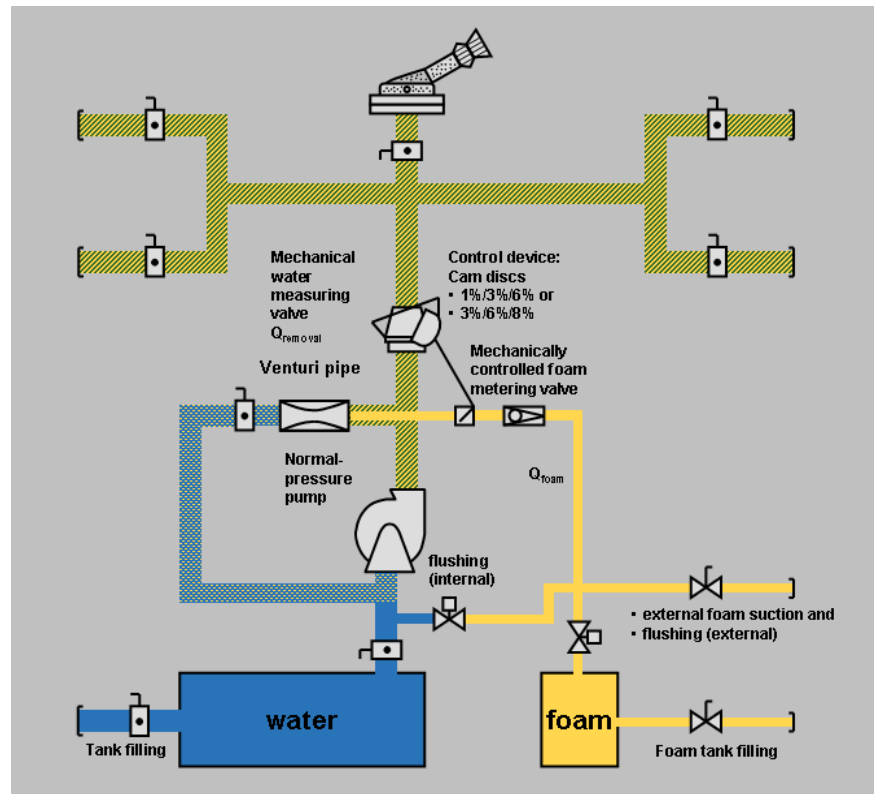

- It can be switch between 3 different proportioning rates during operation.

# FOAMATIC A

Around-the-pump foam proportioning system

R600 pump with FOAMATIC A

Schemata of a R600 with the around-the-pump foam proportioning system FOAMATIC A

## Technical Data

<b>Design</b>	automatic around-the-pump foam proportioning system
<b>Measuring range</b>	400 - 6.000 lpm (105 - 1.585 USgpm)
<b>FC-amount</b>	12 - 480 lpm (3,2 - 127 USgpm) (at a viscosity of 20cSt / 20°C)
<b>Proportioning rate</b>	3 rates to choose (choice of: 1, 3, 6, 8%)
<b>Flow measuring</b>	mechanical water measurement valve
<b>Control</b>	cam discs
<b>Metering</b>	fully automatic, mechanically controlled foam concentrate metering valve
<b>Materials</b>	flow measurement und metering valves made out of corrosion resistant material
<b>Usability</b>	for all standard kinds of foam concentrates

NP: Normal pressure; FC: foam concentrate
