

Comfort-suspenders

Accessories for FIRE MAX 3 protective suit

Improved wear comfort and higher degree of comfort in the shoulder area

The comfort-suspenders are characterized by wide padding in the shoulder region. Visual element and main component is a 5 cm wider, more elastic and above more durable rubber strap in Rosenbauer design. Through the shaping of the padded parts, which are adapted to the body, there is no slipping in the area of the shoulders. Thanks to their foam padding the comfort-suspenders improve the wear comfort during operations with self contained breathing apparati, and ensure additional relief in the shoulder region. Individually adjustable and easily removable. Available as accessories for the FIRE MAX 3 and FIRE MAX 3 IRS protective suit. Machine washable at 60° (gentle cycle).
